

Unified messaging for fax and voice.

InnCommand[™]
INTEGRATED FAX SERVER

Managing faxes at your property has never been easier.

Adding **InnCommand** to your *InnOvation* system allows you to route faxes directly to guest or staff voice mailboxes, making lost and misplaced faxes problems of the past.

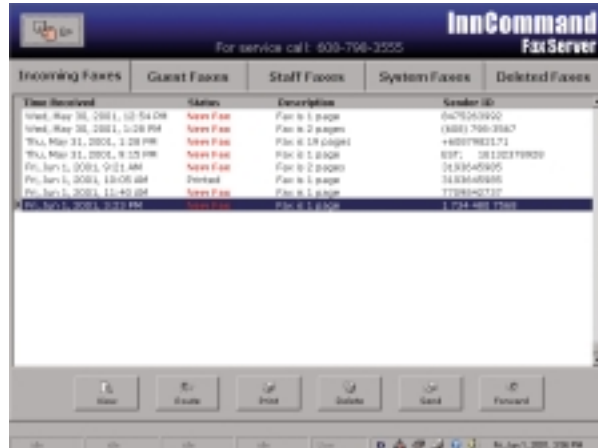

InnCommand gives your property a single source for handling both fax and voice messages. Faxes received by **InnCommand** are routed to the proper mailbox with an easy-to-use interface. When guests or staff members log on, they hear a prompt alerting them that they have received a fax. They can print the fax — either in their room or at the front desk — or they can reroute the fax to any fax number they choose, at any location.

When integrated with *PrivateLine*, **InnCommand** routes faxes to specially assigned extensions with no staff intervention at all. Now *that's* easy.

Route faxes directly to guest or staff voice mailboxes

InnCommand™

InnCommand's interface makes it easy to administer faxes for guests and staff
